Section 2: Dojo - Posting Instructions

Overview

The Dojo uses a two-part system for receiving leads from our vendors. The stages are simply: PRE-PING (optional) and PING. The pre-ping is utilized to check allocation/IP's whitelisted in the system before the lead information is passed to The Dojo. The ping is the actual lead information and data.

Pre-Ping

The Dojo accepts lead "pre-ping" information via an HTTPS POST request. The optional pre-ping validates that a lead can be accepted for the campaign it references. A qualified pre-ping produces a DOJO Pre-Ping ID (DojoPrePingID) which then may be passed as an optional parameter into the subsequent PING. If the Pre-Ping ID is not passed within 10 minutes of creation it will expire. The pre-ping should be posted to the following URLs:

TEST Environment (Staging): <https://stagethedojoleads.bpiedu.com/prospect/preping>

LIVE Environment (Production): <https://thedojoleads.bpiedu.com/prospect/preping>

Pre-Ping Parameters

Parameter	EXAMPLE Values*
client_code	ASH, UROCK
source_campaign_id	260
source_code	2193

*Note: For specific values to use, please refer to Section 1 of this document.

Responses

PRE-PING ACCEPTED

Possible PRE-PING Disqualification Reasons

client_code is not a valid database value

source_code is not a valid database value

unable to find a source_campaign_id matching this provider

you cannot send leads until you are allocated more

No validations were loaded, check your client_code

Ping

The ping contains personal contact information for the lead. This information is used to perform a duplicate check. The ping is submitted via an HTTPS POST to the following URLs:

TEST Environment (Staging): <https://stagethedojoleads.bpiedu.com/prospect/ping>

LIVE Environment (Production): <https://thedojoleads.bpiedu.com/prospect/ping>

PING Disqualified Reasons

Leads may be rejected on the PING for a variety of reasons. The reason for disqualification is provided in the "reason" parameter of the PING response. Reasons are always test descriptions that include details about the violation, and may include data regarding another DojoID that may have

caused the violation.

response	Qualified indicates that a lead is a valid, unique lead for the client. Disqualified means that the lead was rejected by the PING for the reason given in the "reason" response parameter.
DojoID	Unique identifier in TheDojo system for the given lead. Only returned for qualified leads.
Reason	Reason for which the lead was disqualified. Not present on qualified leads.
Message	Error message indicating what may have caused processing to abort abnormally.
